Welcome Stefan M.!

to the World Economic Forum's weekly Strategic Intelligence update.

Equipping youth with skills for a green transition

According to the UN, half of the world's population is 30 or younger. To successfully transition to a green economy, the younger generations must be equipped with the requisite knowledge and skills, which is the theme of this year's International Youth Day.

These 'phages' neutralize harmful bacteria on food. While leaving helpful bacteria intact

Phages are tiny organisms that can be sprayed onto food to neutralize harmful pathogens such as Salmonella, E. coli, and Listeria. Unlike chemicals, phages don't leave harmful residues or damage the friendly germs that help our gut.
